PrimeTranscoder®
Media Transcoding Application

IMAGINE
PRODUCTS, INC®
Workflow experts, from aquisition to archive - we've got your back(up!)
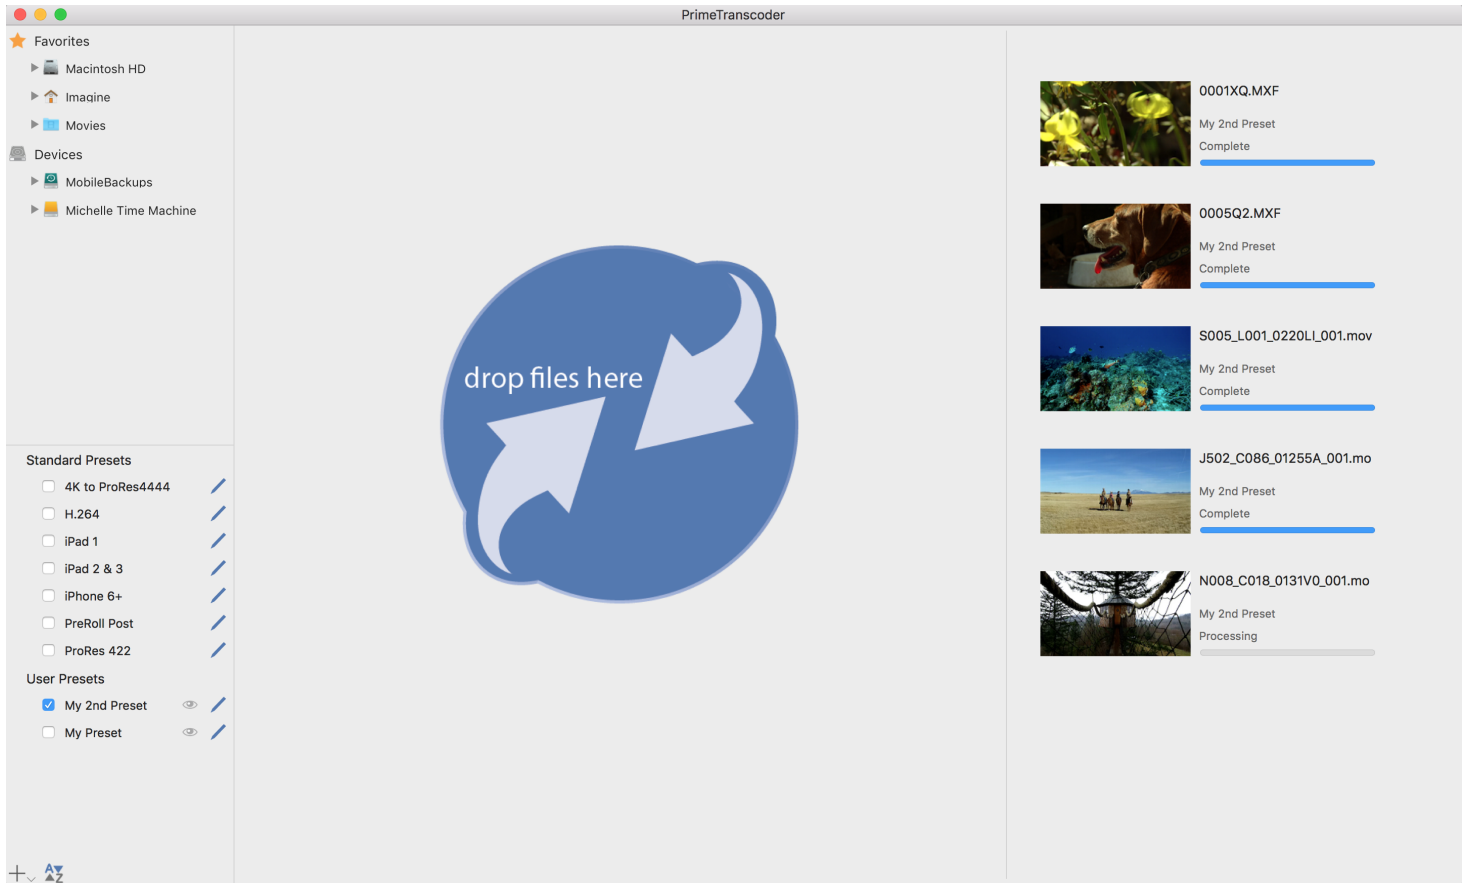

***PrimeTranscoder is a media transcoding application for Mac users.
Automatically convert clips to sharable or editable files at the same time.
GPU acceleration can be used to increase transcoding speed.***

- Transcode over 20 different media file types:
    ARRI, Blackmagic, Canon, Panasonic,
    RED and Sony and many more
- Include native audio and external audio files
- Overlay and burn in any image or text
    as well as timecodes in multiple formats
- Create one clip from many for editable files
- Apply color correction using 1D and 3D LUTs
- Drag and drop card volumes or single video files
- Create user defined presets
    or a standard preset already defined
- Automate the workflow with watch folders,
    using PrimeTranscoder and ShotPut Pro
